### **Assignment 3 – Photograph a Song.**

This assignment is designed to help you start planning your images. Most of the time when you have an idea of what your shot is going to look like, it comes out better.

Listen to your favorite songs and try to create a mental picture of what the artist is singing about then create an image of your interpretation of the song.

For the final turn in you will need to bring your song in on an ipod or CD so we can listen to it while we are viewing your images. You may also find the song online (youtube or other site) and play that during your slideshow.

Tip: Print out the lyrics and read them over, then summarize them with 4 images. Try sketching out the images before you shoot. So you will have something to reference.

However many images it takes to get your message across, minimum 5. But if you pick a faster song you may want more.

For Critique :            10-20 images from your shoot, Unedited. The name and lyrics to your song as a word file.

For Turnin :            Presentation of minimum 5 images while playing your song.
