

Online Portfolio – Assignment 7

You will be required to put your images into some kind of online portfolio and email me a link. You are graded on how easy your portfolio is to get to and to navigate. Things you will lose points on: Sites that require membership or log in information, massive amounts of spam or popups, poor image quality, technical problems.

Consider sites like flickr.com, or photo.net. Or just search for online photo portfolio hosting. If you are considering making your own website and purchasing web space you can make an online gallery straight from photoshop, iPhoto, or Lightroom. Then upload the gallery to your personal website.

One image from each assignment will be required in the online portfolio.

Printed Portfolio – Assignment 8

This is the most important assignment in the class. This is all about presentation. How ever you choose to represent your work as a photographer. Consider mounted prints in a box, prints in a portfolio with sleeves, or some other creative way of displaying your work from this class.
